

Program brief

Catholic Charities has established partnerships with key organizations, including the National Center for Construction Education & Research (NCCER), the Associated General Contractors of America (AGC), New Mexico Workforce Connections of the Central Region (NMWFCC), and Goodwill Industries of New Mexico. Together, we are excited to offer eligible students the opportunity to enroll in the NCCER Specialized Heavy Equipment Training program.

This program opens doors to a thriving career path in Heavy Equipment Operations, where individuals become part of a select group equipped with the skills and discipline required for precision tasks. The Heavy Equipment Operations Program is a comprehensive, industry-aligned course that leads to internationally-recognized certifications. Upon successful completion of the program, students will receive dedicated support in securing immediate employment within the field.

In addition to specialized training, students will also enhance their math, reading, and writing skills, which will facilitate their transition into post-secondary education and apprenticeship training programs.

To ensure eligibility for our adult education and training services, students are required to complete a pre-assessment during the registration process. For those who do not meet the criteria, we will refer them to post-secondary programs better suited to their learning and industry training needs.

For eligible individuals seeking Catholic Charities' educational services, there is an additional step to apply for training funds through the Workforce Innovation and Opportunity Act (WIOA) adult program. Prospective trainees will receive comprehensive support from both Catholic Charities personnel and NM Workforce career specialists to help them complete and submit their funding applications.

Embark on your journey towards a rewarding career in Heavy Equipment Operations with Catholic Charities and our esteemed partners. Together, we're committed to equipping you with the skills and support needed for success in this dynamic industry.

YOUR FUTURE STARTS HERE

NCCER Specialized Heavy Equipment Operation training

Come and start your career in the thriving labor market of Heavy Equipment Operations. Become part of a specialized group of people who have learned the discipline to perform a range of delicate tasks that require skillful concentration. The Heavy Equipment Operations Program is a comprehensive course that is industry developed and awards internationally-recognized certifications.

Participants will also develop math, reading, and writing skills to support their successful transition into post-secondary education.
